

Autogenous welding equipment plant "DONMET" was founded in 1990.

Today is:

- 260 skilled professionals;
- 175 units of modern equipment and mechanical assembly manufacturing;
- The company has a research laboratory, accredited by UkrSEPRO;
- proprietary trading network "DONMET", represented in Kyiv, Donetsk, Luhansk and Zaporizhzhya. In Russia, "Svarshyk-DONMET" is located in the city of Belgorod;
- 98 sales offices in Ukraine, Russia, Belarus, Kazakhstan and the Baltic countries;
- More than 30,000 consumers.

Plant "DONMET" produces 80 types of equipment for gas cutting, welding, brazing, heating and thermal quenching *

- In 2012-2013, DONMET has started production of 12 new models, cutting torches, welding and gas-burners, the balloon reducers.
- All equipment is certified by UkrSEPRO according to ISO 9001-2001 (Certificate № UA2.021.433).
- "DONMET" products have a warranty of 12, 18 or 24 months.
- "DONMET" introduces complex solutions for oxyacetylene equipment.
- [Additional information](#)

* - Cutting torches, special cutting torch for metallurgy, machine cutting torches, flux injection cutting sets (KFR), liquid fuel cutting torches, liquid-fuel tanks, gas welding torches, air torches, circular torches for bodies of rotation, torches for thermal straightening, economizers, gas cylinder pressure regulators, flashback arresters, welding torch tips, cutting torch nozzles.
